Drawings

1. The drawings have been approved.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 50 IS rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bertin et al (2949734).

First duct 5, second duct 10 and third duct between.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 41-43,47-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertin et al (2949734) in view of Griffin et al (4773212).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the third duct of Bertin et al with a pressurized duct as taught by 84 with a cooler of Griffin et al since it would improve efficiency.

1. Claims 44-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertin et al (2949734) in view of Griffin et al 4773212) as applied in the paragraph above, and further in view of Great Britain 2044359.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the nozzle of Bertin with the lobes 12 of GB 2044359 since it will increase mixing.

Claims 35-40 are allowed.
